

Kamal Sayed Kamal

Front-End Developer & Artificial Intelligence engineer

[+201003620544](#) | kk1412ec4869@gmail.com | [Github Profile](#) | [Portfolio](#)

Greater Cairo, Egypt

Summary

A highly motivated Front-End Developer & Artificial Intelligence Engineer with a passion for creating responsive, user-friendly web experiences. Dedicated to writing clean, high-performance code and continuously mastering new technologies. Proven ability to deliver high-quality solutions both independently and within agile teams.

Technical Projects

- [Diamate](#): Architected a responsive React-based medical platform integrating Artificial Intelligence diagnostic algorithms for early diabetes detection, utilizing TailwindCSS for accessible data visualization. (2025)
- [Generator](#): Developed a responsive web utility using **JavaScript (ES6+)** and **DOM manipulation** to generate mock datasets, reducing manual testing time by 30%. (2024)
- [Time_Manager](#): Developed a productivity suite using vanilla JavaScript (ES6+) and LocalStorage, combining persistent task management with customizable countdown algorithms to optimize workflow. (2023)
- [Dashboard](#): Designed a high-fidelity analytics dashboard featuring interactive data visualization widgets and complex CSS Grid/Flexbox layouts for fully responsive device compatibility. (2023)
- [Elzero-Store](#): Built a responsive e-commerce simulation for digital goods, utilizing advanced CSS3 media queries and Grid systems to achieve a seamless cross-platform shopping experience. (2022)
- [Kasper](#): Executed a pixel-perfect PSD-to-HTML conversion, translating static design assets into a semantic, SEO-friendly web interface ensuring 100% design fidelity. (2022)

Education

Bachelor of Computers and Artificial Intelligence | Benha University – Egypt ([link](#)).

Major: Artificial Intelligence (2022 - expected 2026)

Certificates

Machine Learning at Information Technology Consultation and Research Center ([link](#)) (aug 2025-sep 2025)

Skills

- **Front-End**: HTML5, CSS3, JavaScript (ES6+), ReactJS, TailwindCSS, Bootstrap, Sass, Redux Toolkit.
- **Back-End**: Python, Django, FastAPI, MySQL, Oracle DBMS.
- **Artificial Intelligence**: NumPy, Pandas, Matplotlib, Seaborn, Keras, scikit-learn, TensorFlow, OpenCV, MediaPipe, YOLO, NLTK.
- **Tools**: VS Code, Visual Studio, Figma, Git, Postman.
- **Core Concepts**:
 - **Front-End**: Responsive Web Design, Routing, API Integration, Virtual DOM Handling.
 - **Back-End**: Preprocessing, Entity Relationship Modeling, RESTful Architecture.
 - **Machine Learning**: UN/Supervised Learning, Reinforcement Learning, CNNs, RNNs.
 - **Deep Learning**: Autoencoders, Transfer Learning.
 - **Data Structure**: Stacks, Queues, Linked Lists, Trees, Arrays, Vectors.
 - **API**: API Security (OAuth, JWT), API caching and calling.
 - **OOP**: Encapsulation, Abstraction, Inheritance, Polymorphism, Composition.
 - **Problem Solving**: Divide and Conquer, Dynamic Programming, Specialized Algorithms.
 - **Architecture**: SDLC, Agile, Waterfall, MVC.
- **Languages**: Arabic (Native), English.
- **Soft Skills**: Collaborative Teamwork, Research, Time Management, Adaptability.
